Release HREL 6.54

Note: this is a draft of Release 6.54 notes and information contained in this document is subject to change.

General Information	
Business Processes and Job Aids	Changes to the following Business Processes and Jobs Aids have been included in this release:
Known Issues	Resolutions to the following Known Issues have been included in this release:
Updates to User Experience	To the extent possible, additional Module-specific updates will be documented below.

Table Changes- Please review these important notes.

Oracle Critical Patch Updates for PeopleSoft in release 6.54 include a change to PS_NAMES and associated reporting tables and views such as PS_PERSON_NAME and PS_PERSONAL_DATA. This change adds 13 fields related to PeopleSoft preferred name functionality the University System of Georgia (USG) is not using. The new fields are not visible in the OneUSG Connect application.

PeopleSoft Query Managers may notice the new fields when creating or maintaining a query using the impacted records. Institution resources responsible for local integrations and reporting may notice the new fields (table columns) in the database. **USG is not changing any business process or OneUSG Connect functionality for Names and as such, strongly discourages use of the new fields for integration and reporting purposes though some may be populated via PeopleSoft code.**

The OneUSG Connect team is paying close attention to integration and reports involving names. This includes Integration Broker messaging to Georgia*FIRST* and Augusta Financials. All institutions are strongly encouraged to analyze the impact of this change and test accordingly.

Please note that table items are subject to change.

Table Name	Type of Change	Comments
PS_CAN_TAX_DATA	New fields: HIST_CP2_NLGRS_YTD HIST_CP2_TAX_YTD HIST_CP2_TXGRS_YTD HIST_QP2_NLGRS_YTD HIST_QP2_TAX_YTD HIST_QP2_TXGRS_YTD	Oracle Delivered Change - new fields for additional YTD tax info (not in use)

Modifications to Existing Processes

AWARENESS: New fields added to the following records: NAMES, PERSON_NAME, PERSONAL_DATA. See Table Changes section of these Release Notes for detail.	Oracle Delivered Change- No change to OneUSG Connect. The new fields are not visible for usage. PeopleSoft Query Managers may notice the additional fields when creating or maintaining queries using the "Name" records.

Reports/Queries

AWARENESS: PERSONAL_DATA Query Security record change	The aforementioned PERSONAL_DATA update reset all Oracle delivered attributes including the Query Security record (PERALL_SEC_QRY, USG customized in 2018 to include "future"). PERALL_SEC_QRY is an exact match to the pre-6.54 record (BOR_PER_SEC_QRF).

	PERSONAL_DATA query results will be the same after the release as prior.
Queries using Monthly Compensation Rate	Monthly rate now calculates correctly for 10-month employees when queried

Payroll

Modifications to Existing Processes

Quick Calculation (SSC Payroll Only)	Menu > Payroll for North America > Payroll Processing USA > Update Paysheets > By Payline The Quick Calculation feature provides SSC payroll administrators the ability to generate checks for individual employees quickly and without processing payroll calculation for the consolidated Pay Run ID.

Reports/Queries

Preconfirm Audit Report (SSC Payroll Only)	Menu > Payroll for NA > Payroll Processing USA > Produce Payroll > Preconfirm Audit Report Additional criteria have been added to the Preconfirm Audit Report to return employees with future dated Fiscal Year earnings, deductions and check YTD balances.

Page Changes

Release Quick Calculation Lock (SSC Payroll Only)	**Menu > Payroll for North America > Payroll Processing USA > Release Quick Calculation Lock** When a pay calculation or quick calculation is launched, the system adds an entry to the locking table. This entry exists throughout the calculation process in the locking table as a way to prevent another quick calculation for the same parameters from launching and will be removed automatically when the associated calculation process is completed. SSC Payroll can use the Release Quick Calculation Lock page to delete unsuccessful payroll processes from the lock table.
Paycheck Summary	**Menu > Payroll for North America > Payroll Processing USA > Update Paysheets > By Payline > Paycheck Summary** A new view and link to paycheck details is available on the payline page as part of the Quick Calculation process. This section displays the summary and details of the calculated paychecks. It appears after the quick calculation is completed. Paycheck information is no longer available in this section if the payline that was used to calculate the paycheck has been modified.
Tax Update 24-C	**US Payroll Tax & Legislative Compliance Updates** including: • Federal Tax Table updates • State Tax Table updates • Local Tax Table updates • Pennsylvania Local Tax update • Garnishment Tax update **OK to Pay ALL** – Delivered Enhancement that allows mass update of the OK to Pay

	checkbox on paysheet and payline for employees.
