- Reminder: Do not delete the obsolete “1099” Withholding Type from Suppliers. This must stay in the system in case there are IRS corrections for Withholding Reporting in years prior to CY2020.

This process finalizes the Withholding reporting and file creation process. It records all the data in the file you have sent. Do not run this process until after sending the file to the IRS. The system uses this information when creating correction or replacement files.

# Frequently Asked Questions

**Q: If I have already produced my 1099 copy B's, is it still possible to start over since I have not sent anything to the IRS or the recipients?**

**A:** Yes! You can start over at any point prior to sending the information to the IRS. Once it is sent, you would need to create correction files.

**Q: How do I update the 1099 Type / Class for a 'SHARE' supplier?**

**A:** For SHARE suppliers, please submit a ticket to [support@usg.edu](mailto:support@usg.edu).

**Q: How do I update the 1099 Type / Class on a 'B' setid supplier?**

**A:** When adding/changing the 1099 type and/or class for a 'B' setid supplier, you will need to add an effective dated row rather than correcting history. Using the Correct History option will not update the supplier as desired.

# Frequently Asked Questions (Cont'd)

**Q: After making adjustments, my BORRY010 report is not calculating correctly.**

**A:** The BORRY010 report, while rare, can become skewed after making multiple changes to the database. The 1099 to Send (Withhold to Send) report mimics the information that will be sent to the IRS and what will be printed on the 1099s. This is the report that should be used to confirm 100% accuracy prior to completing the 1099 processing.

The BORRY010 is still an excellent report to use for reconciling because it contains more detail than the 1099 to Send report. Therefore, it can be of greater use to pinpoint errors, adjustments needed, etc. For example, the BORRY010 lists each transaction that is reporting on the 1099 and shows the basis amount with differences. The 1099 to Send only shows the total amount that will report on the 1099.

# Frequently Asked Questions (Cont'd)

**Q: Can a Single Payment supplier be marked for withholding? (Ex: Beneficiary payments or Estates)**

**A:** The Single Payment Supplier does not offer an option to add withholding information. Therefore, if the transaction will require a 1099, the supplier will need to be set up as a permanent vendor so that you can add the withholding information. Establishing a permanent vendor record in the PeopleSoft supplier master file ensures accurate information for payments, tax compliance, and reporting. These suppliers can be added to the 'B' or 'Share' setid.
