

AM.020.015 – ADDING FEDERALLY-FUNDED ASSETS

Purpose	<ul style="list-style-type: none"> To add a Federally Funded Asset to the Asset Management module.
Description	<p>Property Control will add assets directly into Asset Management on a limited basis. The typical method of asset addition will be through the Purchasing module. Property Control will need to communicate with Purchasing to determine whether or not the asset has been tagged and to tag the item if it is lacking a tag. A query, BOR_AM_ASSET_NO_TAG_NUMBER, has been developed to identify those assets that are lacking a tag.</p>
Security Role	BOR_AM_MAINTENANCE
Dependencies/ Constraints	<p>Chartfield Combination Edits check that the Chartfields users enter on a transaction meet the defined rules for Valid Chartfield Combinations.</p>
Additional Information	<p>As users enter the asset's Chartfields through either Express Add or Basic Add, the system will validate the user's Chartfields when the user save the asset. If a Combo-Edit rule is violated, users will receive a message letting the user know that Combo Edit errors were found.</p>
