Release 6.00

General Information	
Known Issues	**Known issue** Following Release 6.00, an Oracle bug affects the Type Ahead/Autocomplete functionality for search fields containing a comma. When utilizing a search field containing a comma, PeopleSoft will display :::: characters instead of the comma. If users select the search result, an error message may display, or the search result may return a "No matching values were found" message. **FUNCTIONAL WORKAROUNDS:** 1. Select the value and manually replace the :::: with a comma. 2. Search by using the Look Up icon(Magnifying glass) to search for the field. 3. Disable the Type Ahead/Autocomplete functionality for a specific field, entire page, or all pages by using the following navigations. For more information, see KI9.2.173.Other: Issue when using Type Ahead/Autocomplete functionality.
